April 9, 2020

Dear Reeds Lake Resident(s):

Please find the 2020 schedule for EGLE permitted weed/algae/invasive species treatments planned for Reeds Lake this year with PLM Lake and Land Management (PLM) on the rear side of this notice. **Please note the schedule and mark your calendars accordingly for the season.** Treatment is noted as the “week of” because treatment is subject to weather conditions and therefore providing exact dates for each treatment is not possible. Each treatment is followed up with sampling and inspection by PLM to monitor the effectiveness. Additional treatments may take place if needed and are noted on the notice schedule as “optional.”

During treatment PLM staff will post yellow or green 8.5 x 11 inch notices adjacent to the shoreline on a tree or post that will indicate the date of the treatment, a list of products used and corresponding restrictions associated with their use.

PLM Lake and Land Management staff members are EGLE certified applicators. Any questions regarding the products used or the treatment process can be answered directly by PLM Environmental Scientists by calling 616-891-1294. Additional questions may be directed to the Department of Public Works by calling 616-940-4817.

Thank you-

East Grand Rapids Department of Public Works
