

9/7/23

*Preserving the Road Home*

**ATTENTION PLEASE**

**Dear East Grand Rapids Resident;**

**Weather permitting; your street will be resurfaced in the next few days. For a short part of the day, your street will have limited access. Please adhere to the “No Parking” signs on your street. Parking in your driveway is requested. You will be able to get your car in and out with no trouble. Parking on adjacent streets is fine as well, just observe for “No Parking” signs. This street rehabilitation is a two-part process. First an interlayer will be placed on your street and then a layer of pavement will be laid over the top in 3-7 days. The initial treatment is not the final product! Please be patient and be assured that you will like the look of your street when this two-part process is complete. Thank you for your patience.**

**More information on current schedule and about the process can be found on:**

**<http://www.strawserconstruction.com/resident-updates/>**

From our experience, we know that our success depends upon your cooperation and understanding, so please observe the following:

1. Keep the street free of all parked cars between 7AM and 8PM. Cars parked on the street will have to be towed.
2. After the streets are open to traffic, please drive slowly over the pavement and do not spin your tires.
3. If you have a special circumstance that interferes with this work, please advise any of the workers in the field and they will assist.
4. Please turn off all water sprinklers.
5. This work cannot be completed in the rain. If it rains on the day we're scheduled to work, we'll be back the next day it's not raining.
6. Please keep street free of all trash, recycle carts and bags.
7. **Please Park in your driveway!**

We hope you will not suffer any inconvenience. Will do our best to work quickly and reopen your street to traffic. Generally, your street will be fully open within an hour of the blacktop being placed.

**Thank you for your patience and understanding!**
