

*Preserving the Road Home*

**ATTENTION PLEASE**

**Dear Resident,**

**Weather permitting; your street will be resurfaced in the next few days. For a short part of the day, your street will have construction taking place. Please adhere to the “No Parking” signs on your street. Parking in your driveway is advised. Parking on adjacent streets is fine as well, just observe the “No Parking” signs. This street rehabilitation is a two-part process.**

**This is the second part of the process. There will be short periods of time you may not be able to get to your home. This second part takes 2-3 hours to complete. Thank you for your patience.**

**Our most up to date schedule can be found on:**

**<https://strawserconstruction.com/resident-updates/>**

From our experience, we know that our success depends upon your cooperation and understanding, so please observe the following:

1. Keep the street free of all parked cars between 7AM and 8PM.
2. After the streets are open to traffic, please drive slowly over the pavement and do not spin your tires.
3. If you have a special circumstance that interferes with this work, please advise any of the workers in the field and they will assist.
4. Please turn off all water sprinklers.
5. If your street is scheduled to be worked on and it rains, we will return the next day it's not raining to complete the work.
6. Please keep street free of all garbage carts by placing them on the curb.
7. Understand that the top layer of blacktop is designed for traffic to serve as the rolling mechanism. Traffic on your street will gradually smooth out the surface of the road.

We hope you will not suffer any inconvenience. We will do our best to work quickly and reopen your street to traffic. Generally, your street will be fully open within an hour of the blacktop being placed.

**Thank you for your patience and understanding!**
